PRE-FINAL TEST ANSWER KEY:

DAY 1 – GENERAL INFORMATION

DAY 2 – VERBAL REASONING

DAY 3 – LOGICAL REASONING/CLERICAL ABILITY

DAY 4 – NUMERICAL REASONING

TOPIC: General Information

DISCUSSANT: Mr. Freziel Jade V. Natividad

DIRECTION: The following items pertain to the Philippine Constitution, peace and human rights concepts R.A. 6713 (Code of Conduct and Ethical Standards for Public Officials and Employees), values, and environmental protection and conservation. Read each question carefully and choose the best answer from the given options.

121. Which of the following is least likely to be an effect of global warming?
- A. Increased frequency of hurricanes
 - B. Loss of fertile delta regions for agriculture
 - C. Decreased rate of photosynthesis in vegetation**
 - D. Change in global patterns of precipitation Shrinking of the polar ice regions

122. The presence of which contaminants would be the strongest indicator that municipal sewage sludge is unfit for use as fertilizer?

- A. Human feces
- B. Ammonia
- C. Phosphates
- D. Heavy metals**
- E. Nitrates

123. Reasons that the population of an exotic species often increases rapidly when introduced to a new environment, is due which of the following:

- I. The exotic species is resistant to pesticides
 - II. There is usually a large, underused food source in the new environment
 - III. The exotic species has few natural predators in the new environment
- A. I only
 - B. II only
 - C. I and III only
 - D. II and III only**
 - E. I, II and III

124. Which type of electricity-generating power plant releases radioactive as well as toxic materials such as lead and arsenic under normal operating conditions?

- A. Nuclear
- B. Hydroelectric
- C. Solar
- D. Coal-burning**
- E. Geothermal

125. Which of the following greenhouse gasses has the greatest heat-trapping ability per molecule?

A. Chlorofluorocarbon

B. Methane

C. Carbon dioxide

D. Nitrous oxide

E. Carbon monoxide

126. Environmental science is the study of the interaction of humans with the environment. Which of these would NOT be included as part of the environment?

A. What the soil is made of.

B. Animals and plants in the region and surrounding areas.

C. The average temperature, wind, precipitation, and other climate factors.

D. All of these would be considered part of the environment.

127. Trees are considered _____ resources because they will eventually regrow, given enough time.

A. Renewable

B. Non Renewable

C. Inexhaustible

D. Recyclable

128. Which of the following is the worst culprit when it comes to activities threatening species with extinction?

A. Chemical pollutants

B. Habitat destruction

C. Overharvesting

D. Disease

129. What project of the DENR that includes the protection of Industrial pollution of our environment?

- A. Bantay Kalikasan
- B. Solid Waste Management**
- C. Bantay Dagat
- D. Ecological Watch

130. It is the policy and program governing the soil quality management and proper solid waste disposal in the Philippines.

- A. RA 8749
- B. RA 9275
- C. RA 6969
- D. RA 9003**

131. The Commander-in-Chief of all armed forces of the Philippines this 2023 is:

- A. Air Force Commanding General Connor Anthony Canlas
- B. Pres. Ferdinand R. Marcos, Jr.**
- C. Chief Justice Alexander G. Gesmundo
- D.. AFP Chief Lieutenant Gen. Andres Centino

132. All of the following shall be exempted from taxation except:

- A. Lands and buildings**
- B. Churches and convents
- C. Charitable institutions
- D. Non-profit cemeteries

133. The Civil Service Commission is led by 1 Chairman and how many Commissioners?

- A. 4
- B. 6
- C. 14
- D. 2

134. It states that "no person shall be deprived of life, liberty, or property without due process of law, nor any person be denied the equal protection of the laws. "

- A. Article VI
- B. Executive Order
- C. Bill of Rights
- D. Preamble

135. The following are citizens of the Philippines except:

- A. Those who are naturalized citizens of the Philippines in accordance with law.
- B. Those fathers or mothers are citizens of the Philippines.
- C. Those who are born before January 17, 1973, of Filipino mothers, who elect Philippine citizenship upon reaching the age of majority.
- D. All of the above are true.

136. Who has the exclusive power to initiate all cases of impeachment?

- A. President
- B. House of Representatives
- C. Supreme Court
- D. Senate

137. It is the right and obligation by all citizens, who are at least 18 years of age, and qualified by law, to vote in the election of national and local

officials of the government without literacy, property, or other substantive requirement.

A. Suffrage

B. Referendum

C. Impeachment

D. Plebiscite

138. Which is regarded by the State as a “primary social economic force?”

A. Family

B. Trade

C. Education

D. Labor

139. Which is considered a natural-born citizen of the Philippines?

A. Foreigner who was naturalized

B. Abandoned children found in the country

C. Children born outside of the Philippines, but with parents who are Filipino citizens at the time of your birth

D. None of the above

140. Which of the following is not removable from office by impeachment?

A. Member of the Supreme Court

B. Member of the Constitutional Commissions

C. The Ombudsman

D. Senators

141. Which is not a characteristic of human rights?

A. Human rights are inalienable

B. Human rights are indivisible

C. Human rights are transferable

D. Human rights are inherent to each individual

142. Any person shall not be prosecuted twice for substantially the same crime. This is called:

- A. Right Against Double Taxation
- B. Right Against Double Jeopardy**
- C. Right To Self-Incrimination
- D. Right Against Double Charging

143. A police officer who detains a suspect longer than what is required by law is liable for: _____

- A. Abduction
- B. Illegal Detention**
- C. Kidnapping
- D. House Arrest

144. It is the concealment or distortion of truth in a manner of a fact relevant to one's office or connected with the performance of his duties

- A. Disloyalty
- B. Incompetency
- C. Dishonesty**
- D. Misconduct
- E. Malfeasance

145. As a rule, there should be an authorized agency to promulgate rules and regulations necessary to carry out the provisions of RA 6713. who shall have the primary responsibility for the administration and enforcement of the said account?

- A. Office of the President
- B. Civil Service Commission (Section 4-B)**
- C. DILG
- D. House of the Congress Barangay

146. Nicole, a public official, responded to a letter sent by the public within 15 working days from receipt thereof. Her reply contained the action taken on the request. What duty of public officials and employees is she performing?

- A. Act immediately on the public's personal transactions
- B. Act promptly on letters and requests**
- C. Make documents accessible to the public
- D. Submit annual performance reports
- E. Process documents and papers expeditiously

147. It is the manifest lack of adequate ability and fitness for the satisfactory performance of police duties. This has reference to any physical and intellectual quality, the lack of which substantially incapacitates one to perform the duties of peace officers.

- A. Misconduct
- B. Neglect
- C. Inability
- D. Incompetency**
- E. Nonfeasance

148. It refers to transgression of some established and definite rule of action, where no discretion is left except what necessity may demand; it does not necessarily mean corruption or criminal intention but implies wrongful intention and not mere error of judgment.

- A. Malfeasance
- B. Misfeasance
- C. Nonfeasance
- D. Patriotism
- E. Misconduct**

149. It is a norm of conduct of public officials and employees where they shall provide service to everyone without unfair discrimination and regardless of party affiliation or preference

A. Political Neutrality

B. Professionalism

C. Simple Living

D. Patriotism

E. Justness and Sincerity

150. The following constitute prohibited acts and transactions of any public official and employee EXCEPT:

A. Public officials and employees shall not, directly or indirectly, have any financial or material interest in any transaction requiring the approval of their office.

B. Public officials and employees shall not engage in the private practice of their profession unless authorized by the constitution or law, provided that such practice will not conflict or tend to conflict with their official function.

C. Public officials and employees shall not recommend any person to any position in a private enterprise which has a regular or pending official transaction with their office.

D. Public officials and employees shall not use or divulge confidential or classified information officially known to them by reason of their office and not made available to the public.

E. None of the above

TOPIC: Verbal reasoning (Professional)

DISCUSSANT: Ms. Kristine Joy V. Gleyo

Directions: Arrange the following set of sentences to form a comprehensible and well organized paragraph.

1.
 - a. A person may be unable to cope with the fast pace and complex lifestyles that exist in our present society: as a result, even someone who is an unlikely "criminal type" might be forced into crime.
 - b. Still another theory is based upon the growing evidence that pressures within our modern world have caused the rapid growth in the crime rate.
 - c. For example, a child of very strict parents or from an extremely poor home may run a greater risk of being involved in crimes as he reaches adolescence.
 - d. If a child is reared in a negative environment, he may be more likely to turn to crime than a child who has had more positive influences.
 - e. There is no easy answer to this question: however, psychologists have suggested that clues may be found in the childhood of the criminal.
 - f. What circumstances lead a person to follow a life of crime?
- A. abcdef
- B. fedcba**
- C. dbcafe
- D. febacd
- E. abdcef

Answer: B. Explanation: This is an example of a “Cause and Effect” type of question wherein the author explores or explains why something occurred/occurs. The topic sentence defines the scope of the paragraph (f) which is made even clearer by the succeeding sentence (e). There are two theories of the causes of crime discussed in this paragraph: the first one (d) is supported by an example (c) while the second one (b) is explained even further by the last sentence (a).

2. a. The bravery you have manifested since the start of this Revolution in fighting against the Spanish enemy is the clearest proof that you are not terrified by the noise of the preparations for the invasion here of the army of Polavieja.
- b. That army, in a short span of time, has demonstrated marked cowardice and base conduct by torturing and killing multitudes of our non-combatant people.
- c. Their burning of the towns here, their desecration of the purity of our women without regard to their weakness, the murder of the old and of helpless infants – these acts are not those of any man of honor and courage.
- d. They cry out for vengeance and justice.

(Excerpt from Andres Bonifacio’s “To The Brave Sons Of The People” Speech, 1897)

A. abcd

B. bdca

C. dcba

D. bcad

E. cabd

Answer: A. Explanation: The speech apparently motivates the Filipino revolutionary soldiers in preparation for their impending clash with Polavieja's army, a fact perfectly summarized in the topic sentence/first sentence (a). The next sentence (b) reminds them what "that army" Bonifacio was talking about previously perpetrated that deserves punishment. The last supporting sentence (c) is the "climax" mentioning specific injustices committed by their enemies that inspire them further to fight back.

3. a. I know that you have been wielding against the enemy two potent weapons: Filipino unity and faith.
- b. My fellow countrymen, I am proud of you.
- c. Stronger than any arm of destruction, your weapons are of untold and terrible power.
- d. Stronger than a thousand sheets of steel, with them you are invincible.

(Excerpt from Manuel Quezon's Third Inaugural Address, 1943)

A. bcda

B. abcd

C. cdba

D. bacd

E. dbca

Answer: D.

Explanation: This is a speech so the one where the speaker greets his audience (b) is obviously the first sentence. The next sentence (a) is when the speaker introduces what he wants to talk about. Both (c) (d) look the same. However, the former repeats the same word (i.e., "weapons")

present in the previous sentence so it's more apt to be a supporting sentence than the latter (d) which has the dramatic quality only fit for a concluding sentence.

4. a. Remove the object and you reduce him to inaction.
 b. It seems that these thoughts have never entered the minds of those who cry out against the indolence of the Filipinos.
 c. Man works for an object.
 d. The most active man in the world will fold his arms from the instant he understands that it is madness to bestir himself, that this work will be the cause of his trouble, that for him it will be the cause of vexations at home and of the pirate's greed abroad.

Source: Jose Rizal, "The Indolence of the Filipino," 1890

A. abcd

B. cadb

C. bdac

D. acdb

E. cbad

Answer: B. Explanation: From the get-go, it's very easy to spot the topic sentence (c) because it truly captures what the paragraph is all about despite its brevity. The concluding sentence (b) is likewise very easy to identify as it contains the signal words "these thoughts" which obviously refer to the previous sentences. As for the supporting sentences, the one that immediately follows the topic sentence repeats the word "object" (a) which suggests correlation. The second supporting sentence (d) simply explains the previous sentence with greater details

5. a. Now in its third year, the campaign sees, on the first week of February, archives, special collections, and libraries take to social media with individual images and even entire books compiled from their holdings for the public to color.
- b. In February 2016, with the craze still going strong, New York Academy of Medicine Library gave birth to a new initiative called Color Our Collections Week, a scholarly take on the coloring trend.
- c. Whatever the reasons, sales rocketed: Nielsen logged sales of 12 million for the category in 2015, up from a measly 1 million the year before.
- d. What strange winds conspired to suddenly urge adults in their droves to take up colored pencils again?
- (Source: Melissa N. Morris and Zach Carmichael, "Filling in the Blanks A Prehistory of the Adult Coloring Craze," February 6, 2019.)

A. dcba

B. abcd

C. cdba

D. badc

E. dbac

Answer: A. Explanation: Another type of Paragraph Organization question that you can easily answer by listing the details in order/chronologically. Start by finding the topic sentence which is the first sentence in the paragraph. In most essays, the opening paragraph usually starts with a question (d) to capture readers' attention. From there, you can figure out the exact sequence of the remaining sentences with the help of signal words or clues. In this case, for example, each sentence directly or

indirectly mentions a year in chronological order: “2015” (c), “In February 2016 (b), and “Now in its third year” meaning the year after 2016 (a).

6. a. However, Dr. William H. Fowler, Jr. of the UCLA medical school claims that studies show there is no increase in strength, motor performance, or vital capacities.
- b. There is a growing controversy over the use of drugs in sports.
- c. Denny McLain, pitcher for the Detroit Tigers, claims that he needs pep pills or something to keep him going, especially when he is expected to be good 162 ball games a year.
- A. abc
- B. cba
- C. bca
- D. cab
- E. acb

Answer: C. Explanation: This is a Comparison Contrast type of question wherein the author relates the ideas to one another by showing how they are similar or different. The first sentence (b) is simply a prelude to the two ideas that the author is comparing/contrasting. The two sentences that follow are the ones being compared with the signal word "However" an indicator that the sentence where it is located (a) contrasts with the previous sentence (c). Apparently, the sentence containing "However" is the last and concluding part of this paragraph.

7. a. The BBC’s current television version starring Benedict Cumberbatch is perhaps one of the most successful, not least as its scriptwriters combine a deep knowledge of the original with a flair for

departing wittily from it: the show's strategy of allusion, transformation, and up-to-dateness gives it both freshness and familiarity.

b. Conan Doyle's Sherlock Holmes saga has enjoyed -- or in some cases suffered -- countless reinventions since its original publication from 1887 to 1927.

c. The new series begins with 'The Empty Hearse', its title alluding playfully to Conan Doyle's 1903 story 'The Empty House' in which Holmes returns from apparent death at the hands of Professor Moriarty in Switzerland.

A. abc

B. cba

C. bca

D. cab

E. bac

Answer: E. Explanation: The sentence that begins with "Conan Doyle's Sherlock Holmes" (b) is the topic sentence as it defines the topic of the entire paragraph. Topic sentences are usually broad while supporting sentences are more specific. In this case, the main topic is the detective fiction Sherlock Holmes and its "countless reinventions" over the years. The next sentence (a) specifies the new and current reinvention of the well-loved classic, making it as a mere supporting sentence. The last one (c) adds more details about the new series so it only functions as a supporting sentence of the previous one.

8. a. And finally, read the last paragraph, which will probably contain a summary of the material.
- b. First, before you attempt to read anything, look over the length of the material to see if you have time to read it: if not, mark a spot where you intend to stop.
- c. Here is a four-step method which can help you prevent your mind from wandering while reading.
- d. Second, read the title and the first paragraph, looking for the main idea of the article.
- e. By doing this, you condition your mind to 'accept the material you want to read, and thus reduce mind wandering.
- f. Next, read the boldface headings, if there are any, and the first sentence of each paragraph.
- A. abcdef
- B. febcad
- C. cbdfae
- D. dfcbae
- E. fedcba

Answer: C. Explanation: This is an example of a Paragraph Organization question that uses the Sequence of Events/Chronological format. In this format, the author lists details/steps in order in which they occur or should be followed. The first thing that you need to do is to identify the topic sentence (c) which contains the main idea and defines the scope of the paragraph. Then, identify the supporting sentences which usually begin with connecting/transition words that provide clues on how they should be arranged. In this paragraph, the transition words used in chronological order are first, second, next, and and finally. The transition word "next"

cannot possibly follow "first" because "second" already exists. Hence, it only makes sense if it comes after "second" and before "and finally" which is obviously the last item in this step-by-step guide.

9. a. He greatly enjoyed the poems of Victorian writers such as Alfred, Lord Tennyson, and Christina Rossetti.
- b. Probably his best known is called “Jabberwocky,” with its opening line of “’Twas brillig, and the slithy toves...”, and its many invented words, some that have now entered the English language, such as “chortle” and “galumph”.
- c. Although best known as the author of Alice’s Adventures in Wonderland (1865) and Through the Looking-Glass (1871), Lewis Carroll - the pen-name of Charles Lutwidge Dodgson, a mathematical lecturer at Christ Church, Oxford - was also an avid reader and writer of poetry.
- d. His own poems were varied – some just humorous nonsense, some filled with hidden meanings, and some serious poems about love and life.
- A. abcd
- B. dbca
- C. cabd
- D. cadb**
- E. bcad

Answer: D. Explanation: The sentence containing the name Lewis Carroll (c) is obviously the topic sentence not just because it sets the direction of the entire paragraph but also because the rest of sentences only refer to him as either “he” or “his”, a clear indication that they only serve as supporting

sentences. The topic sentence introduced Lewis Carroll as “also an avid reader and writer of poetry” which are explored in the two supporting sentences, (a) and (d), respectively. The last sentence (b) merely presents additional details to support the previous sentence which describes Carroll’s own works as a poet.

10. a. All the same, most people today are well aware unicorns don’t exist.
b. Unicorns seem to be everywhere these days.
c. They have become a fashionable cultural icon of fantasy, escapism, and (somewhat paradoxically) individuality – a fact exploited to the full by manufacturers and marketing experts.
d. It’s virtually impossible to walk down a high street or go into a gift shop without coming face to face with one of these rainbow-spangled creatures in some form or another.
- A. abcd
B. dbca
C. cabd
D. bdca
E. acbd

Answer: D. Explanation: This is a typical example of a Paragraph Organization question wherein the author expresses one main idea or central thought and then follows it with supporting details. The topic sentence (b) is a short statement expressing how ubiquitous unicorns are these days. The author proves this point by mentioning how easy it is to physically encounter unicorns “in some form or other” whenever you go outside (d). The next sentence (c) takes it even further by mentioning how unicorns have infiltrated the culture. The concluding sentence (a) can be

easily identified using the connecting words “all the same” which signifies that despite all the things mentioned previously, people are still aware that unicorns don’t exist in real life.

Directions: Choose the best meaning or synonym of the underlined word in each sentence

11. Every Christian's path is beset by peril.

- A. bested
- B. frightened
- C. surrounded
- D. chased

Answer: C. Explanation: Beset is to come at a target from all directions.

12. The power failure at 8 P.M. caused consternation among the barangay's residents.

- A. dismay
- B. deliberation
- C. disability
- D. distaste

Answer: A. Explanation: Consternation means confusion, surprise, and often anger directed toward a person or an event

13. The consensus among the congressmen was that the bill would not be passed.

- A. divided
- B. controversy

C. gathering

D. agreement

Answer: D. Explanation: A consensus is an agreement reached among members of a group.

14. Tempestuous times preceded the EDSA People Power Revolution.

A. emotionally charged

B. temperate

C. trying

D. peaceful

Answer: A. Explanation: Tempestuous describes any event that is characterized by strong, turbulent, or conflicting emotion.

15. Imelda Marcos was known for her ostentatious extravagance.

A. oscillating

B. loud

C. wealthy

D. showy

Answer: D. Explanation: Ostentatious displays are intended to attract attention and impress other people.

16. Some believe that the treatment for modern-day depression is complete abstinence from social media use.

A. absence

B. avoidance

C. sickness

D. prescription

Answer: B. Explanation: Abstinence is usually used to describe the avoidance of something addictive.

17. Filipino revolutionary heroes made a vehement protest against Spanish colonization.

A. veiled

B. verified

C. impassioned

D. voracious

Answer: C. Explanation: Vehement is synonymous to impassioned, passionate, ardent, heated, and spirited.

18. The consolidated revenues of his two companies declined during the pandemic.

A. advertised

B. united

C. divided

D. met

Answer: B. Explanation: Consolidated contains the prefix "con-" which means "with". To consolidate is to group together.

19. Noel waited in agony as his wife went through the throes of childbirth.

A. struggle

B. study

C. wake

D. theater

Answer: A. Explanation: Throes refers to the intense or violent pain and struggle, especially accompanying death, birth, or any significant change.

20. A less scrupulous plumber could easily have unnecessarily replaced the drainpipes and run up the cost.

- A. afraid
- B. employed
- C. careful
- D. infamous

Answer: C. Explanation: Scrupulous is diligent or a person who is attentive to detail.

21. Paulo wanted to become a doctor because of his desire to mitigate misery in the world.

- A. aggravate
- B. intensify
- C. finish
- D. alleviate

Answer: Explanation: D. Mitigate means to alleviate, reduce, lessen, or diminish.

22. The Spanish colonizers subjugated the native population of the Philippines in order to introduce Christianity.

- A. liberated
- B. subdued
- C. frightened
- D. digressed

Answer: B. Explanation: Subjugate means to bring under domination or control.

23. The country's air pollution guidelines are not as stringent as the climate change advocates want them to be.

A. lax

B. flexible

C. strict

D. tolerant

Answer: C. Explanation: Stringent means strict, precise, and exacting.

24. Noemi is furious at her friend who bamboozled her into investing in a pyramid scheme.

A. immoral

B. duped

C. amoral

D. honest

Answer: B. Explanation: Bamboozled means to be deceived or duped.

25. The vice-president took power in the interim period before the election.

A. interval

B. interception

C. interaction

D. insertion

Answer: A. Explanation: An interim is a time period between events.

Directions: The sentences below may or may not contain an error that violates the standard rules of using verb tenses, adjectives, adverbs, prepositions, parallelism, subject-verb agreement, pronoun-antecedent agreement, etc. Choose which of the underlined word(s) or phrases contain an error or need to be replaced to make the sentence correct. Choose 'E' if the sentence contains no error.

26. (A) Although the student body (B) continue to get smaller, the superintendent (C) insists that the high school (D) is thriving. (E) No error.

- a. Although
- b. **continue**
- c. insist that
- d. Is thriving
- e. No error

Answer: B Explanation: The subject “student body” is used in the sentence as one unit and is therefore considered singular requiring a singular form of verb (i.e., continues).

27. The (A) strangely distorted, colorful pictures by Picasso (B) has received much attention (C) not only from the critics, (D) but also from the general public. (E) No error.

- a. Strangely distorted
- b. **Has received**
- c. not only
- d. But also from

e. No errors.

. Answer: B Explanation: The subject is plural (i.e., pictures) hence the plural form of the verb, have received, must be used.

28. (A) Everyone (B) who plans (C) to attend the senior retreat (D) need to pack appropriate camping supplies. (E) No error.

- a. Everyone
- b. Who plans
- c. To attend
- d. Need
- e. No error

Answer: D Explanation: Everyone is an indefinite pronoun that must be treated as singular so the singular form of the verb (i.e., needs) should be used. To remember this key rule, you can convert “Everyone” in your mind into “Every single one” as in “Every single one needs...”

29. Sheila (A) attended the Asian Institute of Management (AIM), which (B) was in Legazpi Village (C) in Makati. (D) No error.

- a. attended
- b. was
- c. in
- d. No error

Answer: B Explanation: The location of AIM most likely remains in Makati unless it moved recently. Therefore, the present tense of the verb is more logical.

30. Carlos (A) did not want to go to the Frost Daze Dance, (B) nevertheless, his friends (C) convinced him to attend the once-in-a-lifetime event, and he also knew his grandmamma (D) wanted him to socialize more. (E) No error.

- a. did not want
- b. nevertheless
- c. convinced
- d. wanted
- e. No error

Answer: E Explanation: The sentence contains no errors.

31. Maude Adams, after her spectacular (A) triumph as the original Peter Pan, (B) went about (C) heavy veiled and was accessible to (D) only a handful of intimate friends. (E) No error.

- a. triumph
- b. went about
- c. heavy veiled
- d. only a handful
- e. No error

Answer: C Explanation: “Heavy” in this sentence is used to modify the participle “veiled” so it should be in the form of an adverb instead of an adjective. The sentence can be corrected as follows: Maude Adams, after her spectacular triumph as the original Peter Pan, went about heavily veiled and was accessible to only a handful of intimate friends.

32. The board (A) reviewing the courses offered by the college (B) found that the quality of academic programs (C) were generally good but (D) somewhat uneven. (E) No error.

- a. reviewing
- b. found
- c. were
- d. somewhat
- e. No error

. Answer: C Explanation: The singular noun “quality” must be followed by an equally singular verb “was” instead of “were”

33. At the music recital, Alexandra (A) enjoyed listening to her friend Mohammed's insightful interpretation, (B) which she thought was (C) more sophisticated (D) than the other performers. (E) No error.

- a. enjoyed listening
- b. which she
- c. more sophisticated
- d. than the other performers
- e. No error

Answer: D Explanation: This is a case of illogical comparison because it compares two completely different things: Mohammed’s insightful interpretation and the other performers. The first part of the statement specifically mentions “Mohammed’s insightful interpretation” and not Mohammed himself. So, to correct the statement, Mohammed’s interpretation should be compared to other performers’ interpretations, as in At the music recital, Alexandra enjoyed listening to her friend Mohammed's insightful interpretation, which she thought was more sophisticated than the interpretations of the other performers.

34. The students (A) have discovered that (B) they can address issues more effectively (C) through letter-writing campaigns (D) and not through public demonstrations. (E) No error.

- a. have discovered
- b. they
- c. through
- d. and not
- e. No error

Answer: D Explanation: The sentence is making a comparison between letter-writing campaigns and public demonstrations. This comparison is introduced using the adverb “more” and should have been accompanied by the conjunction “than” instead of “and not”. The sentence can be corrected as follows: The students have discovered that they can address issues more effectively through letter-writing campaigns than through public demonstrations.

35. (A) Only the chairman of the board, (B) not his fellow board members, (C) reports to the President of the company (D) once a month. (E) No error.

- a. Only the chairman
- b. not his fellow board members
- c. reports to the President
- d. once a month
- e. No error

Answer: E Explanation: The sentence contains no errors.

Directions: The following sentences contain a blank space provided for a missing word that will complete their meaning. Choose the word that best fits the meaning of each sentence

36. It is every person's _____ to live the life he or she chooses.

- A. composite
- B. eloquence
- C. prerogative
- D. allusion
- E. demise

Answer: C. Explanation: Prerogative (n.) means an exclusive or special right or privilege.

37. In the famous balcony scene, Romeo _____ Juliet's beauty is one of the most romantic soliloquies ever written.

- A. sanctions
- B. extols
- C. peruses
- D. beguiles
- E. fetters

Answer: B. Explanation: To extol (v.) means to praise highly, exalt, glorify.

38. The graph clearly showed the company reaching the _____ in profits during the 1980s when the economy was in a boom period.

- A. narthex
- B. gullet

C. gamut

D. quiescence

E. vertex

Answer: E. Explanation: Vertex (n.) means the highest point of anything; the apex or summit.

39. Oliver was unable to _____ himself from the difficulties he had caused by forging the documents.

A. reprove

B. pique

C. oust

D. extricate

E. broach

Answer: D. Explanation: To extricate (v.) is to release from an entanglement or difficulty, disengage.

40. Dogs growl and show their teeth in an attempt to _____ the animal or person they perceive as a threat.

A. bolster

B. waylay

C. cow

D. exacerbate

E. appease

Answer: C. Explanation: To cow (v.) is to intimidate, frighten with threats or show of force.

Directions: Read the passages and answer the questions that follow.

For questions 41-44:

Between us there was, as I have already said somewhere, the bond of the sea. Besides holding our hearts together through long periods of separation, it had the effect of making us tolerant of each other's yarns-and even convictions. The Lawyer-the best of old fellows-had, because of his many years and many virtues, the only cushion on deck, and was lying on the only rug. The Accountant had already brought out a box of dominoes and was toying architecturally with the bones. Marlow sat cross-legged right aft, leaning against the mizzenmast. He had sunken cheeks, a yellow complexion, a straight back, an ascetic aspect, and, with his arms dropped, the palms of hands outwards, resembled an idol. The Director, satisfied the anchor had a good hold, made his way aft and sat down amongst us. We exchanged a few words lazily. Afterwards there was silence on board the yacht. For some reason or other we did not begin that game of dominoes. We felt meditative and fit for nothing but placid staring. The day was ending in a serenity of still and exquisite brilliance. The water shone pacifically; the sky, without a speck, was a benign immensity of unstained light; the very mist on the Essex marshes was like a gauzy and radiant fabric, hung from the wooded rises inland, and draping the low shores in diaphanous folds. Only the gloom to the west, brooding over the upper reaches, became more sombre every minute, as if angered by the approach of the sun. And at last, in its curved and imperceptible fall, the sun sank low, and from glowing white changed to a dull red without rays and without heat, as if about to go out suddenly, stricken to death by the touch of that gloom

brooding over a crowd of men. From 'The Heart of Darkness', by Joseph Conrad

41. The narrator of this passage is telling his story from:

- A. a wharf.
- B. the deck of a yacht.**
- C. a high vantage point.
- D. the edge of the Essex marshes.
- E. None of the above.

42. The mood of the men in this passage is best described as:

- A. surly.
- B. resigned.
- C. contemplative.**
- D. restless.
- E. ecstatic.

43. From the passage, it is clear that the men:

- A. do not get along.
- B. show a quiet understanding.**
- C. cannot be bothered with one another.
- D. have just had a quarrel.
- E. are worn out.

44. The word 'diaphanous', used to describe the mist, means:

- A. almost transparent.**
- B. fragile.

- C. suffocating.
- D. silent
- E. none of the above.

TOPIC: Logical reasoning (Professional)

DISCUSSANT: Mr. Marc Zeus Flauta

DIRECTIONS: In each of the following questions, there is a certain relationship between two given words on one side of (: :) and one word is given on another side (: :) while another word is to be found from the given alternatives, having the same relation with this word as the words of the given pair bear. Choose the correct alternative.

45. Circle : Arc :: Square : _____

- A. Line**
- B. Triangle
- C. Sphere
- D. Rectangle

Answer : A. As 'Arc' is a part of 'Circle', in the same way 'Line' is a part of 'Square'.

46. Horse : Equine:: _____

- A. Lion : Carnivorous
- B. Cat : Feline**
- C. Table : Furniture

D. Dog : Vulpine

Answer: B. Here, Equine is related to or affecting horses or other members of the horse family. Similarly, Feline is related to or affecting cats or other members of cat family.

47. Dubious : Certain :: _____

A. Hot : Angry

B. Long : Elongated

C. Cold : Warm

D. Short : Dawar Fish

Answer: C. Dubious' is the antonym of 'Certain' and similarly, 'Cold' is the antonym of 'Warm'.

48. Fish : Shoal :: _____

A. Audience : Theater

B. Shark : School. – *can be reconsider from the viewpoint of Mr. Flauta but for me the correct answer for this one 3.*

C. Elephant : Flock

D. Whale : Herd

Answer: C. A group of 'Fish' is called 'Shoal'. Similarly, a group of elephants is called 'Flock'.

49. Horse : Mare

A. Fox : Vixen

B. Bullock : Doe

C. Monk : Monkey

D. Bee : Hen

Answer: A. 'Mare' is the female 'Horse' and similarly, 'Vixen' is the female 'Fox'.

50. Pig : Sty :: _____

A. Donkey : Bray

B. Hen : Chick

C. Owl : Barn

D. Bird : Asylum

Answer: C. A 'Pig' lives in a 'Sty' and in the same way an 'Owl' lives in a 'Barn'.

51. Wax : Candle :: _____ : Paper

A. Tree

B. Bamboo

C. Pulp

D. Wood

Answer: C. Former is used to manufacture latter

52. Peat : Lignite :: Bituminous : _____

A. Granite

B. Basalt

C. Anthracite

D. Coke

Answer: C. All represent the different forms of coal.

53. Sheep : Mutton :: Deer : _____

A. Veal

B. Meat

C. Flesh

D. Venison

Answer: D. As 'Mutton' is the meat of 'Sheep', similarly 'Venison' is the meat of 'Deer'

54. Aryabhatta : Mathematician :: Varahamihira : _____

A. Physician

B. Astronomer

C. Scientist – *this can be reconsidered also but I think the correct answer is Physician.*

D. Architect

Answer: A. Aryabhatta' was the famous 'Mathematician' of the ancient period, in the same way 'Varahamihira' was a famous 'Physician' of the ancient period.

DIRECTIONS: Analyze and choose the letter corresponding to the correct answer.

81. Statement: "You are hereby appointed as a programmer with a probation period of one year and your performance will be reviewed at the end of the period for confirmation." – A line in an appointment letter.

Assumptions:

I. The performance of an individual generally is not known at the time of appointment.

II. Generally an individual tries to prove his worth in the probation period.

a. Only assumption II is implicit

b. Neither I nor II is implicit

c. Both I and II are implicit

d. Either I or II is implicit

e. Only assumption I is implicit

Answer: C. *The performance of the individual has to be tested over a span of time as the statement mentions. So, I is implicit. The statement mentions that the individual's worth shall be reviewed (during probation period) before confirmation. So, II is also implicit.*

82. June was distracted by his dog while jumping on the trampoline; he slipped and broke his right arm. That same afternoon, the dog chased the cat up a tree. Another time June was walking his dog, the dog pulled June too fast; June fell and broke his right arm.

A. June's dog is dangerous and must be destroyed.

B. June should let his sister walk the dog.

C. June is left-handed.

D. June is accident-prone.

83. The Shop and Save Grocery is south of Greenwood Pharmacy.

Rebecca's house is northeast of Greenwood Pharmacy.

Rebecca's house is west of the Shop and Save Grocery.

If the first two statements are true, the third statement is

A. true.

B. false.

C. uncertain.

Answer: B. Because the first two statements are true, Rebecca's house is also northeast of the Shop and Save

Grocery, which means that the third statement is false.

84. Middletown is north of Centerville.

Centerville is east of Penfield.

Penfield is northwest of Middletown.

If the first two statements are true, the third statement is

A. true.

B. false.

C. uncertain.

Answer: B. Because the first two statements are true, Penfield is west of Centerville and southwest of Middletown. Therefore, the third statement is false.

85. Martina is sitting at the desk behind Jerome.

Jerome is sitting at the desk behind Bryant.

Bryant is sitting at the desk behind Martina.

If the first two statements are true, the third statement is

A. true.

B. false.

C. uncertain.

Answer: B. Given the information in the first two statements, Bryant is sitting in front of both Jerome and Martina, so the third statement must be false.

86. Battery X lasts longer than Battery Y.

Battery Y doesn't last as long as Battery Z.

Battery Z lasts longer than Battery X.

If the first two statements are true, the third statement is

A. true.

B. false.

C. uncertain.

Answer: C. The first two statements indicate that Battery Y lasts the least amount of time, but it cannot be determined if Battery Z lasts longer than Battery X.

87. All spotted Gangles have long tails.

Short-haired Gangles always have short tails.

Long-tailed Gangles never have short hair.

If the first two statements are true, the third statement is

A. true.

B. false.

C. uncertain.

Answer: We know only that long-tailed Gangles have spots. We cannot know for certain if long-tailed Gangles also have short hair.

88. Joe is younger than Kathy.

Mark was born after Joe.

Kathy is older than Mark.

If the first two statements are true, the third statement is

A. true.

B. false.

C. uncertain.

Answer: A. Joe is younger than Kathy and older than Mark, so Mark must be younger than Kathy.

89. Red kites fly higher than yellow kites.

Yellow balloons fly higher than red kites.

Yellow kites fly higher than yellow balloons.

If the first two statements are true, the third is

A.) true.

B.) false.

C.) uncertain.

90. Ludo is fairer than Cisco.

Cisco is fairer than Mila.

Therefore, _____.

A. Ludo is fairer than Mila

B. Cisco is fairer than Ludo

C. Mila is fairer than Cisco

D. Mila is the fairest of them all

Answer: A. SOLUTION:

A. Ludo is fairer than Mila

The fairness of the three people can be ranked as follows:

Ludo > Cisco

Ludo > Cisco > Mila

91. All magicians are deceivers.

Oz is a magician.

Therefore, _____

A. Oz is not a magician

B. Oz is a deceiver

C. Oz is not a deceiver

D. Oz may not be a deceiver

Answer: B. Since all magicians are deceivers and Oz is a magician (a part of the set being described, then Oz is a deceiver.

92. Erin is twelve years old. For three years, she has been asking her parents for a dog. Her parents have told her that they believe a dog would not be happy in an apartment, but they have given her permission to have a bird. Erin has not yet decided what kind of bird she would like to have.

A. Erin's parents like birds better than they like dogs.

B. Erin does not like birds.

C. Erin and her parents live in an apartment.

D. Erin and her parents would like to move.

Answer: C. Since Erin's parents think a dog would not be happy in an apartment, we can reasonably conclude that the family lives in an

apartment. We do not know if Erin's parents dislike dogs (choice a) or if Erin dislikes birds (choice b). There is no support for choice d.

93. Four people witnessed a robbery. Each of them gave a different description of the robber. Which description is probably right?

A. . The robber was average height, thin, and middle-aged.

B. The robber was tall, thin, and middle-aged

C. The robber was tall, thin, and young

D. The robber was tall, of average weight, and middle-aged

Answer: B. Tall, thin, and middle-aged are the parts of the description repeated most often and are therefore the most likely to be accurate.

94. Either Erica will marry Rudy or Erica will work abroad. Erica did not work abroad. Therefore, _____.

A. Erica will marry Rudy

B. Erica loves Rudy

C. Erica does not love Rudy

D. Erica will not marry Rudy

Answer: A. The argument follows this reasoning: If P or Q, and not P, then Q. Since Erica did not work abroad, she will marry Rudy, which is in choice 1.

95. If the inflation rate significantly increases in the next quarter, the BSP will raise the interest rates or sell bonds to the public. Which of the following is necessary for the BSP to raise interest rates?

A. The inflation rate did not increase significantly, and the BSP did not sell bonds to the public

B. The inflation rate significantly increased, and the BSP sold bonds to the public

C. The inflation rate significantly increased, and the BSP did not sell bonds to the public.

Answer: C. If the inflation rate significantly increases, BSP raises the interest rate or sells bonds to the public. Otherwise, nothing will happen. Therefore, BSP will only raise interests if the inflation rate significantly increases and if it does not sell bonds to the public

96. Anton is behind Dominic. Carl is ahead of Anton and Dominic. Bobby is in between Anton and Dominic. Meanwhile, Earl is in between Dominic and Carl. Anton overtakes Earl. Afterward, Bobby overtakes Dominic. Lastly, Dominic overtakes Anton. Which runner is behind Anton?

A. Bobby

B. Carl

C. Dominic

D. Earl

Answer: D. Anton is behind Dominic. Carl is ahead of Anton and Dominic.

Bobby is in between Anton and Dominic. Meanwhile, Earl is in between

Dominic and Carl. Anton overtakes Earl $C > A > E > D > B$ Afterward, Bobby

overtakes Dominic. $C > A > E > B > D$ Lastly, Dominic overtakes Anton. $C > D$

$> A > E > B$

97. Melvin is shorter than Ivo. Roland is shorter than Melvin. Casper is taller than Ivo. Who is the third tallest person among the four?

A. Melvin

B. Ivo

C. Roland

D. Casper

Answer: A. Melvin is shorter than Ivo: $Ivo > Melvin$ Roland is shorter than

Melvin. $Ivo > Melvin > Roland$ Casper is taller than Ivo. $Casper > Ivo > Melvin$

$> Roland$

98. Rocky is a son of Amos's father's sister. Sam is the son of Divina who is the mother of Gerry and grandmother of Amos. Ashton is the father of

Tanya and grandfather of Rocky. Divina is the wife of Ashton. How is Rocky related to Divina?

A. Nephew

B. Son

C. Grandson

D. Data inadequate

Answer : C. Since Divina is the grandmother of Amos and Amos and Rocky are cousins (from the first statement), Rocky should be a grandson to Divina.

99. Pointing to a photograph of a boy, Mr. Ram said, "He is the only son of my mother." How is Mr. Ram related to that boy?

A. Brother

B. Uncle

C. Cousin

D. Father

Answer: D

100. Musicians are generally creative. Some of them are frustrated.

Frustrated people are prone to become alcoholics. What can we conclude from these statements?

A. All frustrated people are alcoholics

B. Some musicians may be alcoholics

C. All alcoholics are musicians

D. Frustrated people are creative

Answer : B. Given that some of the musicians are frustrated, and frustrated people tend to become alcoholics, we can conclude that some musicians may be alcoholics.

101. Inside the cinema, Holden was seated in seat 53. Morris was sitting to the right of Holden in seat 54. In the seat to the left of Holden was Garry. Icarus was sitting to the left of Garry. Which seat was Icarus seating?

A. 51

B. 54

C. 55

D. 56

Answer: A. 51 52 53 54

(I) (G) (H) (M)

102. The fifth day of the month falls on a Thursday. What day of the week will precede the ninth day of the month?

A. Sunday

B. Tuesday

C. Thursday

D. Monday

Answer: A. The fifth day of the month is Thursday. What we need to figure out first is the ninth day. So counting four days from Thursday, we get Monday. Now, we have to know the preceding the day – Sunday.

103. CMM, EOO, GQQ, ____, KUU

A. GRR

B. GSS

C. ISS

D. ITT

Answer: C. The first letters are in alphabetical order with a letter skipped in between each segment: C, E, G, I, K. The second and third letters are repeated; they are also in order with a skipped letter: M, O, Q, S, U.

104. QAR, RAS, SAT, TAU

A. UAV

B. UAT

C. TAS

D. TAT

Answer: A. In this series, the third letter is repeated as the first letter of the next segment. The middle letter, A, remains the same. The third letters are in alphabetical order, beginning with R.

105. QPO, NML, KJI, ____, EDC

A. HGF

B. CAB

C. JKL

D. GHI

Answer: A. The solution behind this problem is simple: the series consists of letters in a reverse alphabetical order.

DIRECTIONS: Analyze and solve each problem carefully then shade the letter

corresponding to the correct answer.

106. 3, 15, 75, _____

A. 105

B. 205

C. 375

D. 370

Answer: C. This is a geometric sequence with a common ratio of 5. Hence, the missing term can be obtained by multiplying 75 by 5: $75 \times 5 = 375$.

Hence, the missing term is 375.

107. 72, 36, 18, _____

A. 9

B. 10

C. 5

D. 4

Answer : A. In this geometric sequence, the common ratio is a fraction (or decimal) which is $\frac{1}{2}$. This means that to get the next term, we multiply $\frac{1}{2}$ (or divide by 2) the previous term.

$$72 \times \frac{1}{2} = 36$$

$$36 \times \frac{1}{2} = 18$$

Therefore, the missing term can be determined by multiplying $\frac{1}{2}$ by

18 (or dividing 18 by 2):

$$18 \times \frac{1}{2} = 9$$

Thus, the missing term is 9.

108. _____, 6, 10, 16, 26, ...

A. 5

B. 4

C. 6

D. 2

Answer: B. The given sequence is recursive such that the succeeding term is obtained by adding two previous terms. For example, “26” is obtained by adding two terms preceding it, which are “10” and “16”.

To identify the missing number, we recognize that “10” was obtained by adding “6” and the missing number. Hence, the missing number should be $10 - 6 = 4$.

The answer is 4.

109. 6, 7, 21, 22, 66, _____

A. 66

B. 67

C. 68

D. 69

Answer: B. The number series alternately adds 1 and multiplies 3 by the terms to get the succeeding terms.

$$6 + 1 = 7$$

$$7 \times 3 = 21$$

$$21 + 1 = 22$$

$$22 \times 3 = 66$$

The sequence ends with multiplication by 3, so the next operation should be the addition of 1:

$$66 + 1 = 67$$

Therefore, the missing number is 67.

110. 1, 9, 25, 49, _____?

A. 72

B. 81

C. 100

D. 144

Answer: B. The sequence above is the squares of the odd numbers.

$$1 \times 1 = 1$$

$$3 \times 3 = 9$$

$$5 \times 5 = 25$$

$$7 \times 7 = 49$$

The odd number next to 7 is 9. So, to get the next term, we have to square 9:

$$9 \times 9 = 81$$

Therefore, the missing term is 81.

111. 1, 8, 27, 64, 125, _____,

A. 216

B. 200

C. 300

D. 316

Answer : A. The sequence above follows the perfect cube number pattern in which the first 5 whole numbers were cubed.

$$1^3 = 1 \times 1 \times 1 = 1$$

$$2^3 = 2 \times 2 \times 2 = 8$$

$$3^3 = 3 \times 3 \times 3 = 27$$

$$4^3 = 4 \times 4 \times 4 = 64$$

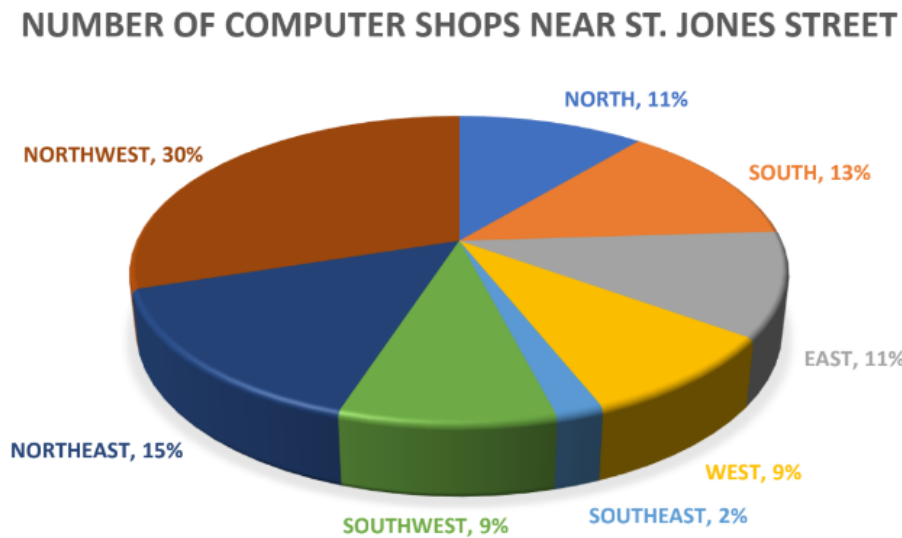

$$5^3 = 5 \times 5 \times 5 = 125$$

Hence, the missing term should be the cube of 6:

$$6^3 = 6 \times 6 \times 6 = 216$$

The cube of 6 is 216. Therefore, the missing term is 216.

DIRECTION: Read the following information carefully and answer the questions given below:

112. If the total number of computer shops near St. Jones Street is 230, how many shops are there in the Northwest area approximately?

- A. 60
- B. 70**
- C. 80
- D. 90

Answer: B. Solution:

$$230 \times 30\% = 69 \text{ (approximately 70)}$$

113. How many more percent of computer shops does the Northeast have than the North area?

- A. 7%
- B. 5%
- C. 2%
- D. 4%**

Answer: D. Solution:

Northeast – North ($15\% - 11\% = 4\%$)

114. Which two areas have the same number of computer shops?

- A. West and Southwest
- B. North & West
- C. Southwest & Northwest
- D. West & Southeast

Answer : A. Solutions:

The two areas with the same number of computer shop West and Southwest since they both have 9% of the total number of computer shops.

115. How many computer shops are there in North and West Areas, approximately?

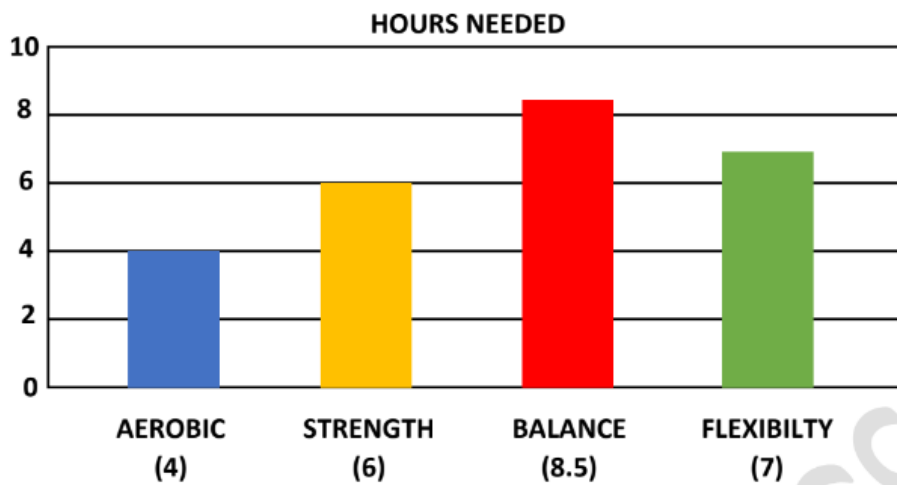

- A. 40
- B. 50
- C. 45
- D. 55

Answer : C. Solution:

North + West

$$(11\% \times 230 = 25.3) + (9\% \times 230 = 20.7) = 45$$

WORK OUT TIME NEEDED TO BURN 5000 CALORIES

116. How many calories are you going to burn using aerobic exercises in 2 hours?

- A. 2000 calories
- B. 2500 calories**
- C. 3000 calories
- D. 2250 calories

Answer : B. Solution:

$5000 \text{ calories} / 4 \text{ hours} = 1,250 \text{ calories/hour}$

$1250 \text{ calories/hour} \times 2 \text{ hours} = 2,500 \text{ calories}$

117. If you wanted to work out using strength exercises, how many hours will it take you to burn 3000 calories?

- A. 4 hours
- B. 3.2 hours
- C. 3.6 hours**
- D. 3 hours

Answer : C. Solution:

$5,000 \text{ calories} / 6 \text{ hours} = 833.33 \text{ calories/hour}$

118. 4 hours is what percent of completing flexibility exercise time to burn a total of 5000 calories, approximately?

A. 70%

B. 50%

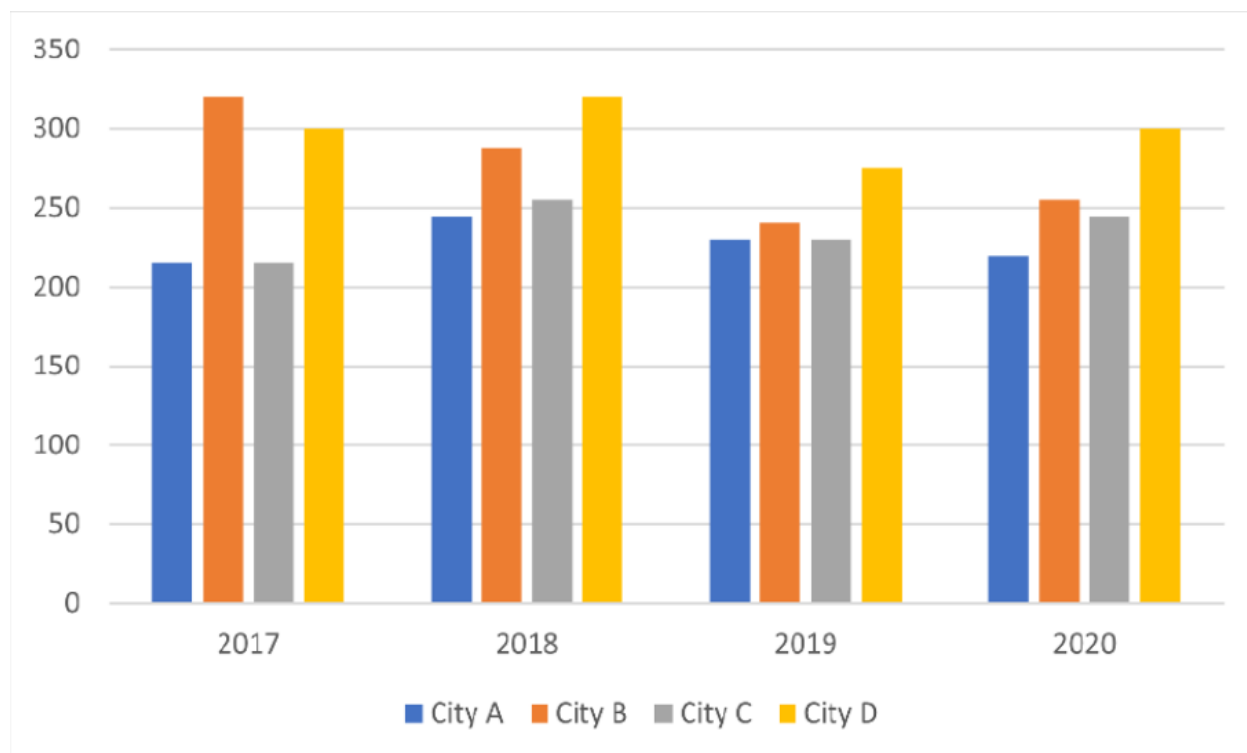

C. 80%

D. 60%

Answer : D. Solution:

$4 \text{ hours} / 7 \text{ hours} = 57\% \text{ (approximately 60\%)}$

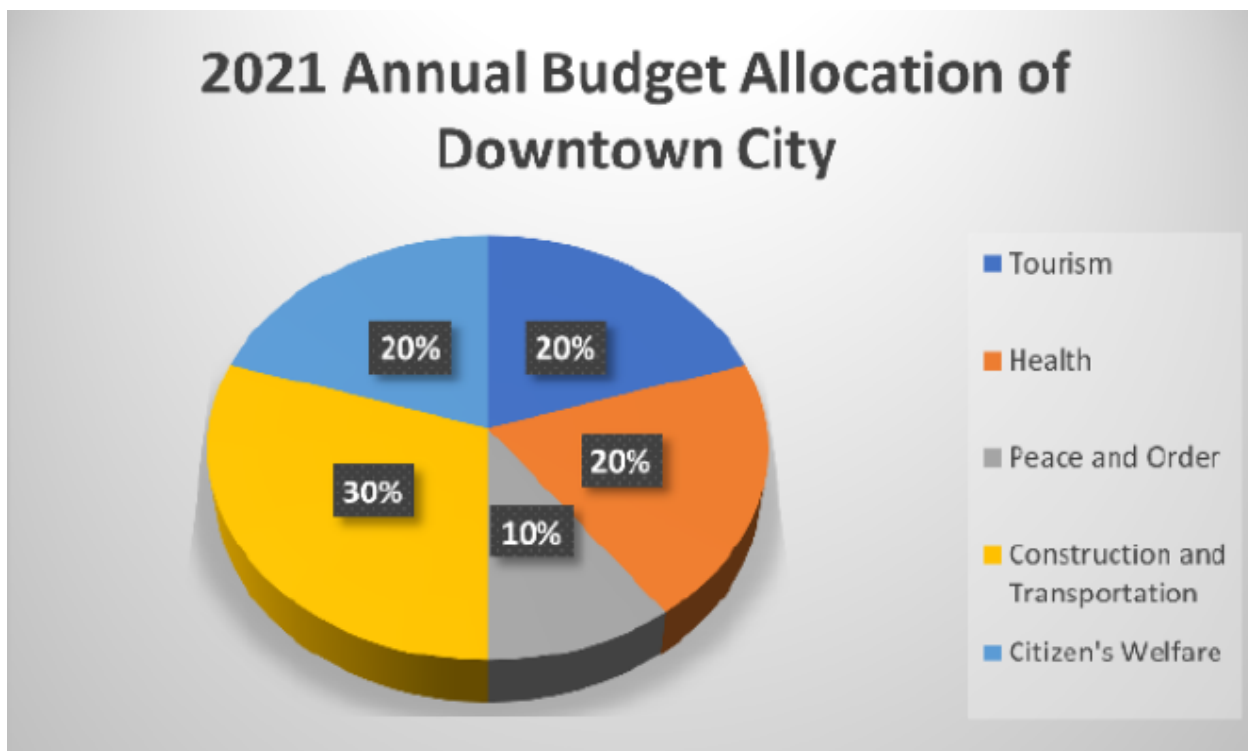

119. A fast-food chain has four branches in four different cities: City A, City B, City C, and City D. Shown below are the average number of customers each year of the four branches of the fast food chain. Based on the given bar graphs below, which of the following statements is FALSE

A. The most performing branch in 2019 is the branch in City D.

- B. The most performing branch in 2017 is City B
- C. Throughout the years 2017-2019, the performance of City D is continuously decreasing
- D. City C performed better in 2019 as compared to 2018.**

120. The Downtown City allocated Php 75 000 000 for buildings, roads, bridges, railways and infrastructure development projects. Shown below is the allocation of Downtown City's annual budget for 2021. How much is allocated for Health?

- A. Php 50 000 000
- B. Php 55 000 000
- C. Php 70 000 000
- D. Php 15 000 000**

Answer : D. Solution

Health x annual budget

$$20\% \times 75000000 = 15000000$$

TOPIC: Clerical ability (Sub-professional)

DISCUSSANT: Mr. Elvinjan J. Acuña

Directions: Arrange each group of items in alphabetical order.

45. A. Commission on the Filipino Language

B. Commission on Human Rights

C. Commission on Higher Education

D. Commission on Population

1. ABCD

2. CBDA

3. BCDA

4. ACBD

46. A. Cooperative Development Authority

B. Cottage Industry Development Enterprise

C. Cottage Industry Technology Center

D. Council for the Welfare of Children

1. ABCD

2. ACBD

3. BCAD

4. CBAD

47. A. Food and Nutrition Research Institute
B. Fiber Industry Development Authority
C. Foreign Service Institute
D. Family Planning Organization of the Philippines

1. ABCD

2. BACD

3. DBCA

4. **DBAC**

48. A. Presidential Commission on Good Governance
B. Presidential Commission to Fight Poverty
C. Presidential Commission for the Urban Poor
D. Presidential Commission on Human Rights

1. CBAD

2. CBAD

3. CABD

4. **CADB**

49. A. AA Industrial Chemical Supply
B. AB Capital and Investment Corporation
C. A Soriano Aviation Incorporated
D. A-1 Driving Company Incorporated

1. **DCAB**

2. DCBA

3. ABCD

4. CABD

DIRECTIONS: For each set of words, choose the one that is spelled correctly.

50. 1. **Consequently**
2. Consaquently
3. consequantly
4. Consciquantly
5. Conciquently
51. 1. Embarased
2. Embarassed
3. **embarrassed**
4. Embbarassed
5. Embarased
52. 1. Acknowlegement
2. Acknowlegment
3. **acknowledgment**
4. Acknowledegement
5. none of these
53. 1. **Probability**
2. Probebility
3. probability
4. Prabability
5. Probablity
54. 1. Referrance
2. **Reference**
3. referance
4. Refarrence

5. Reeference

DIRECTIONS: Choose the correct spelling for the missing word in each of the following sentences.

55. The newly-fallen snow _____ transformed the landscape.

1. **Magically**
2. Magickelly
3. majicelly
4. Magicaly

56. It is my _____ that municipal employees handle their jobs with great professionalism.

1. Beleif
2. Bilief
3. **Belief**
4. beleaf

57. The baby's soft skin was _____ to the harsh winter wind.

1. Sinsitive
2. **Sensitive**
3. sensative
4. Sinsative

58. I just don't know what I would do in her _____.

1. Sittuation
2. **situation**
3. situashun
4. sitation

59. The caverns were so damp that my skin felt _____.

1. clamby
2. clammy
3. clammy
4. clammy

60. This is a type of document issued by a seller to a buyer relating to a sale transaction and indicating the products, quantities and prices sold to the buyer.

1. Check voucher
2. Purchase order
3. Delivery receipt
4. Sales invoice

61. Which of the following is not a usual document used in a sales company?

1. Form 137
2. Delivery receipt
3. Sales invoice
4. Purchase order

62. One of the responsibilities of a clerical job is answering and tending phone calls. Which is the best way to answer a phone call in a company?

1. Say "Hello," and wait for the caller to speak.
2. Run and get a pen and notebook then pick up the phone.
3. Answer the phone politely and give your department or company name.
4. Wait for fellow employees to answer the phone.

63. An example of a hard copy document is:

1. PDF file letter

2. Company email message
3. A business letter saved in USB
4. Business letter in a paper

64. What does a CC mean in an email message?

1. Copy sent
2. Copy furnished
3. Copycat
4. Client copy

65. How many spaces between their address and the salutation?

1. 1
2. 2
3. 3
4. 4
5. 5

66. The salutation is the greeting line.

1. true
2. false
3. sometimes
4. uncertain

67. Which of the following software program will help you do computation easier?

1. MS Word
2. MS Powerpoint

3. MS Excel

4. MS Publisher

5. MS Office

68. To make a board meeting more presentable, which tool will be useful?

1. MS Word

2. MS Powerpoint

3. MS Excel

4. MS Publisher

5. MS Office

69. If you were to handle an order of your company's merchandise from a customer, which of the following is not one of the things you will do?

1. prepare on voice of the order you received

2. note the customer and his address

3. carefully check the order

4. keep the enclosed payment in your custody

5. consult your head if some information are missing regarding orders.

70. If the head of an organization implemented an internal policy or changes in an existing policy, which of the following will be received by your office?

1. ordinance

2. law

3. memorandum

4. motion

5. all of the above

71. This is a type of document issued by a seller to a buyer relating to a sale transaction and indicating the products, quantities and prices sold to the buyer.

1. Check voucher
2. Purchase order
3. Delivery receipt
4. Sales invoice

72. Which of the following is not a usual document used in a sales company?

1. Form 137
2. Delivery receipt
3. Sales invoice
4. Purchase order

73. One of the responsibilities of a clerical job is answering and tending phone calls. Which is the best way to answer a phone call in a company?

1. Say "Hello," and wait for the caller to speak.
2. Run and get a pen and notebook then pick up the phone.
3. Answer the phone politely and give your department or company name.
4. Wait for fellow employees to answer the phone.

74. An example of a hard copy document is:

1. PDF file letter
2. Company email message
3. A business letter saved in USB
4. Business letter in a paper

75. This is a telephonic transmission of scanned documents of texts and images to a telephone number connected to a printer.

1. Photocopying Machine

2. Fax Machine
3. Typewriter
4. Inkjet Printer

76. The chief financial officer is responsible for the financial matters and financial management of a corporation, she is also known as the _____.

1. Auditor
2. Treasurer
3. Chief Executive Officer
4. Manager

77. Which department of a company is responsible for cash register operations and payment processing?

1. Cashier
2. Billing
3. Accounting
4. Budget

TOPIC: Numerical reasoning
DISCUSSANT: Ms. Leonalyn Mutya-Tayone

Directions: Read the following questions carefully. In each question, you will be asked to compute the given values using basic mathematical operations. Select the letter of the correct answer.

55. Fred bought three items that are priced at Php 567, Php 430, and Php 180. He paid the cashier an amount of Php 2000. How much money was left to Fred?

- (A) Php 680
- (B) Php 752
- (C) Php 823**
- (D) Php 915

Answer: C Explanation: The cost of the items that Fred bought is equal to:
 $567 + 430 + 180 = 1177$. To determine the amount of money left to Fred: $2000 - 1177 = 823$.

56. Anton plans to give of his savings to his brother. Anton's savings amounts to Php 5400. $\frac{2}{3}$ How much money will his brother receive?

- (A) Php 500
- (B) Php 1300
- (C) Php 2700
- (D) Php 3600**

Answer: D Explanation:

Explanation: The problem asked us to determine $\frac{2}{3}$ of 5400 (this is the amount of money received by Anton's brother). $\frac{2}{3}$ of 5400 also means $\frac{2}{3} \times 5400$ ("of" is a signal word for multiplication of fractions). Thus, to compute $\frac{2}{3} \times 5400$ without using calculator, start with 2×5400 and divide the product by 3:

$$\frac{2}{3} \times 5400 = \frac{2 \times 5400}{3} = \frac{10800}{3} = 3600$$

57. Which of the following has the least value?

- (A) $\frac{5}{6}$
- (B) 0.90
- (C) $\frac{3}{4}$
- (D) 0.80

Answer: C

Explanation: You may either change all values in the options into decimal form or fraction form (whichever you find easier) so that you can easily compare the values.

If we change all values into decimal form, we have:

- (A) $\frac{5}{6} = 5 \div 6 = 0.83$
- (B) 0.90
- (C) $\frac{3}{4} = 3 \div 4 = 0.75$
- (D) 0.80

Note that from the given options, 0.75 or $\frac{3}{4}$ has the least value.

58. Use the order of operations to simplify: $12 \times (27 - 2^3) \div 4$

- (A) 79
- (B) 57
- (C) 300
- (D) 73

Answer: B

Explanation: Using PEMDAS, we start with the expression inside the parentheses which is $27 - 2^3$. Note that since the terms inside the parenthesis have an exponent, we can then simplify the exponent inside the parenthesis.

$$\begin{aligned} &12 \times (27 - 2^3) \div 4 \\ &12 \times (27 - 8) \div 4 \\ &12 \times (19) \div 4 \end{aligned}$$

Now, we can perform multiplication:

$$\begin{aligned} &12 \times (19) \div 4 \\ &228 \div 4 \end{aligned}$$

Lastly, we divide the remaining numbers:

$$\begin{aligned} &228 \div 4 \\ &57 \end{aligned}$$

59. Solve for the value of m in the equation: $4m - 19 = 7m - 70$

- (A) 17

(B) 21

(C) 27

(D) 13

Answer: A

Explanation:

$$4m - 19 = 7m - 70$$

Group similar terms:

$$70 - 19 = 7m - 4m$$

Simplify the Left and Right hand side of the equation:

$$51 = 3m$$

Divide both sides by 3:

$$17 = m$$

$$m = 17$$

60. The weights of nine office workers have an average of 45 kilos. What is the sum of the weights of the nine office workers?

(A) 375 kilos

(B) 405 kilos

(C) 475 kilos

(D) 500 kilos

Answer: B

Explanation: To obtain the average of a set of numbers, we divide the sum of these numbers by the total number of addends.

$$\frac{\text{sum of numbers}}{\text{total number of addends}} = \text{average}$$

The problem asked us to determine the sum of the weights of nine office workers given that the average of their weights is 45 kilos.

Let X be the sum of their weights

$$\frac{X}{9} = 45$$

Multiplying both sides by 9:

$$X = 9 \times 45 = 405$$

Thus the sum of their weights is 405 kilos.

61. Compute: $-1^3 + (-2)^3 - (-1)^2$

(A) 8

(B) -8

(C) 10

(D) -10

Answer: D

$$- 1^3 + (- 2)^3 - (- 1)^2$$

Simplifying each term with exponents:

$$- 1 + (- 8) - (1)$$

Performing the indicated operations from left to right:

$$\begin{aligned} & - 9 - 1 \\ & - 9 + (- 1) \\ & - 10 \end{aligned}$$

62. A burger costs Php 32.50 while a bottle of juice drink costs Php 25.00. Suppose that Alex bought 2 burgers and 3 bottles of juice drink. How much did Alex pay for the food he bought?

(A) Php 380.00

(B) Php 260.00

(C) Php 140.00

(D) Php 50.00

Answer: C Explanation: Cost of one burger: Php 32.50 → Cost of two burgers: $2 \times 32.50 = 65$ Cost of one bottle of juice drink: Php 25.00 → Cost of three bottles of juice drink: $3 \times 25.00 = 75$ Total amount that Alex paid: $65 + 75 = 140$

63.

Which of the following is NOT equivalent to $\frac{1}{3} + 2\frac{2}{5}$?

(A) $\frac{41}{15}$

(B) 2.7333...

(C) $2\frac{11}{15}$

(D) $\frac{43}{15}$

Answer: D

Explanation: We need to simplify the given expression to determine its value:

$$\frac{1}{3} + 2\frac{2}{5}$$

First, transform the mixed fraction into an improper fraction:

$$\frac{1}{3} + \frac{12}{5}$$

Make the fractions similar:

$$\frac{5}{15} + \frac{36}{15}$$

Combine the fractions:

$$\frac{41}{15}$$

We're now going to compare each value in the given options and determine which is not equivalent $\frac{41}{15}$

(A) $\frac{41}{15}$ is clearly equivalent to $\frac{41}{15}$

(B) 2.7333.. is obtained if you divide 41 by 15. Thus, this is equivalent to $\frac{41}{15}$

(C) $2\frac{11}{15}$ is the mixed form of $\frac{41}{15}$

(D) $\frac{43}{15}$ is not equivalent to $\frac{41}{15}$, since $\frac{43}{15}$ has a larger numerator.

Thus, $\frac{43}{15}$ is the value from the options which is not equivalent to $\frac{1}{3} + 2\frac{2}{5}$

63. A piece of ribbon was divided into three parts according to a ratio of 3 : 4 : 5. If the ribbon is 150 cm long. What is the measure of the longest piece of the ribbon?

(A) 62.5 cm

(B) 72.5 cm

(C) 81 cm

(D) 92.5 cm

Answer: A

Explanation:

Let :

$3x$ be the measure of the shortest piece;

$4x$ be the measure of the medium piece; and

$5x$ be the measure of the largest piece.

The sum of the measures of these pieces of ribbon is 150 cm. Thus,

$$3x + 4x + 5x = 150$$

$$12x = 150$$

Dividing both sides by 12:

$$x = \frac{150}{12} \text{ or } x = 12.5$$

Recall that $5x$ represents the measure of the largest piece. Thus,

$$5(12.5) = 62.5$$

64. The length of a rectangle is 5 more than twice its width. If the perimeter of the rectangle is 58 cm. What is its area?

(A) 122 sq. cm

(B) 144 sq. cm

(C) 152 sq. cm

(D) 168 sq. cm

Answer: D Explanation: The formula for the perimeter of a rectangle is: $P =$

$2l + 2w$ The given rectangle in the problem has a length which is 5 more than

its width. Let w be the width of the rectangle. Then, the length of the

rectangle is $l = 2w + 5$ The perimeter of the rectangle is 58 cm.

$$P = 2l + 2w \quad 58 = 2(2w + 5) + 2w$$

$$58 = 4w + 10 + 2w$$

$$58 = 6w + 10 \quad 58 - 10 = 6w$$

$$6w = 48$$

$$w = 8$$

The rectangle has a width of 8 cm Meanwhile, the length of the rectangle is

$l = 2(8) + 5 = 21$ cm Now, to find the area of the rectangle

$$A = lw$$

$$A = 21(8) = 168 \text{ cm}^2$$

65. Alice obtained the following grades in her Math class for the last three quarters: 89, 88 and 86. Alice is aiming to be part of her class' honor roll. To be part of it, she must achieve at least an average of 90 in her Math Class for the four quarters. What is the smallest possible grade that Alice must achieve in the fourth quarter so that she will be part of her class' honor roll?

(A) 89

(B) 92

(C) 96

(D) 97

Answer: D Explanation: Let X be Alice's grade for the fourth quarter in her Math class. Since Alice must achieved at least an average of 90 to make it in the honor roll:

$$\frac{89 + 88 + 86 + X}{4} \geq 90$$

Multiplying both sides by 4:

$$\begin{aligned} 4 \left(\frac{89 + 88 + 86 + X}{4} \right) &\geq 4(90) \\ 89 + 88 + 86 + X &\geq 360 \\ 263 + X &\geq 360 \\ X &\geq 97 \end{aligned}$$

Thus, Alice must obtain a grade of 97 or higher to be part of her class' honor roll.

66. Every month, a company's revenue increases by 10%. In January, the company's revenue was reported to be at Php 30 000. What might be the revenue of the company in March?

(A) Php 32 800

(B) Php 34 300

(C) Php 36 300

(D) Php 38 800

Answer: C Explanation: The company's revenue increases by 10% each month: January: Php 30 000 To find the company's revenue for the month of February, we just add the 10% of 30 000 to January's revenue: February: $30\,000 + 30\,000(0.10) = 30\,000 + 3\,000 = 33\,000$ We will just perform the same method for the month of March: March: $33\,000 + 33\,000(0.10) = 33\,000 + 3\,300 = 36\,300$

67. The sum of 5 consecutive odd integers is equal to -56 plus the largest of the odd integers. What is the smallest odd integer?

(A) -17

(B) -15

(C) -21

(D) -25

Answer: A Explanation : Let x be the smallest odd integer. Since the odd integers are consecutive. Then, the succeeding integers are: $x + 2$, $x + 4$, $x + 6$, and $x + 8$ (we just add 2 to the previous integer since the integers are odd). The sum of these five consecutive odd integers is equal to -56 plus the largest of the odd integers. Note that $x + 8$ is the largest of the five integers we have defined above. Then, we can form this equation:

$$x + (x + 2) + (x + 4) + (x + 6) + (x + 8) = -56 + (x + 8)$$

Simplifying:

$$5x + 20 = -48 + x$$

$$4x = -68$$

$$x = -17$$

The smallest odd integer in our problem is -17.

68. The cost per square meter of floor tiles is Php 420.00. Harry plans to tile the floor of his room which is 2.5 m long and 3.5 m wide. How much will Harry pay for the tiles?

(A) Php 2550

(B) Php 3675

(C) Php 4575

(D) Php 5215

Answer: B Explanation: To determine how many square meters Harry's room occupies, we need to determine the area of the room.

$$A = l \times w$$

$$A = 2.5 \times 3.5$$

$$A = 8.75 \text{ m}^2$$

Thus, Harry's room has an area of 8.75 square meters. The cost for floor tiles is given as Php 420.00 per square meters: $8.75 \times 420 = \text{Php } 3675.00$ Thus, Harry needs to pay Php 3675.00 for his room's floor tiles.

69. What is the median of 29, 43, 13, 2, 52, 19, 10, 38?

(A) 24

(B) 19

(C) 40

(D) 20

10. Answer: A Explanation: To find the median of the set of values: 29, 43, 13, 2, 52, 19, 10, 38

Step 1: Arrange the values in increasing order: 2, 10, 13, 19, 29, 38, 43,

52

Step 2: Determine the middle value(s): In this set: 2, 10, 13, 19, 29, 38, 43, 52, there are 8 values.

If the given set of values has an even number of members, we are expecting that there are two middle values. Otherwise, the set of values has only one middle value.

Thus, we are expecting that there are 2 middle values in the given set of values:

2, 10, 13, 19, 29, 38, 43, 52

Step 3: Obtain the mean or average of the middle values: $19 + 29/2 = 48/2 = 24$

Thus, the median is 24.

70. The sum of two numbers is 180. The numbers are in a ratio of 1 : 5. What is the larger number?

- (A) 90
- (B) 120
- (C) 150
- (D) 180

Answer: C Explanation: Let m be the smaller number and $5m$ be the larger number. The sum of these numbers is 180.

Thus,

$$m + 5m = 180$$

Solving for the value of m :

$$m + 5m = 180$$

$$6m = 180$$

$$m = 30$$

To find the larger number:

$$5m = 5(30) = 150$$

Direction: Read the word problems below carefully. Choose the letter of the correct answer for each question.

71.. Eric is 12 years older than Freddie. If the sum of their ages is 52. How old is Eric?

(A) 42

(B) 32

(C) 22

(D) 12

Answer: B Explanation:

Let x be Freddie's age Since Eric is 12 years older than Freddie, then Eric's age can be expressed as $x + 12$

The sum of the ages of Freddie and Eric is 52.

Thus,

$$x + (x + 12) = 52$$

$$2x + 12 = 52$$

$$2x = 40$$

$$x = 20$$

Freddie is 20 years old.

To determine how old is Eric, we substitute

$$x = 20 \text{ to } x + 12$$

$$x + 12$$

$$(20) + 12 = 32$$

Therefore, Eric is 32 years old.

72. Five years ago, Pat was 15 years younger than Mark. This year, Mark's age is twice Pat's age. How old was Pat five years ago?

(A) 35

(B) 20

(C) 15

(D) 10

Answer: D Explanation:

We let x be Mark's age five years ago. Since five years ago, Pat is 15 years younger than Mark, then we can express Pat's age five years ago as $x - 5$.

To obtain their ages in the current year, we just add 5 to the expressions representing the ages of Mark and Pat.

In solving age problems such that the ages are given in the current year and in previous years (past), it is helpful for us to use a table to organize the ideas.

	PAST	Present (+ 5 years)
Pat	$x - 15$	$x - 10$
Mark	x	$x + 5$

This year, Mark's age is twice Pat's age. Thus, we are now going to focus on the respective ages of Pat and Mark in the present. If Mark's age is $x + 5$ in the present, then this is equal to twice of Pat's age in the present which is $2(x - 10)$.

$$x + 5 = 2(x - 10)$$

$$x + 5 = 2x - 20$$

$$x - 2x = -5 - 20$$

$$-x = -25$$

$$x = 25$$

Looking from the table, x represents Mark's age five years ago. Thus, Mark was 25 years old five years ago. To determine Pat's age five years ago, we substitute

$$x = 25 \text{ to } x - 15.$$

$$x - 15$$

$$(25) - 15 = 10$$

Five years ago, Pat was 10 years old.

73. Two cars moved from a common starting point but in opposite directions. One car travels 5 kph faster than the other car. After 3 hours, the cars are 435 km apart. What are the rates of the slower and the faster car?

- (A) 60 kph and 65 kph respectively
- (B) 65 kph and 70 kph respectively
- (C) 70 kph and 75 kph respectively**
- (D) 75 kph and 80 kph respectively

Answer: C Explanation:

Let's start by providing an illustration for the problem

Based on the illustration, the sum of the distances covered by the faster and the slower car is 435 km.

Let x be the rate of the slower car. Then, $x + 5$ is the rate of the faster car.

	Rate	Time	Distance
Faster car	$x + 5$	3	$3(x + 5)$
Slower car	x	3	$3x$

Since the sum of the distances covered by the cars is 435 km. Then,

$$3(x + 5) + 3x = 435$$

Solving for the value of x :

$$3x + 15 + 3x = 435$$

$$6x + 15 = 435$$

$$6x = 420$$

$$x = 70$$

Since x represents the rate of the slower car, then the rate of the slower car is 70 kph. Meanwhile, the rate of the faster car can be obtained by substituting $x = 70$ to $x + 5 = 70 + 5 = 75$ kph.

74. Fourteen years ago, Mica was 9 years older than Beatris. If currently, the sum of their ages is 75. Determine how old Beatris was 14 years ago.

(A) 27

(B) 18

(C) 36

(D) 19

Answer: D Explanation:

Let x be Beatris' age fourteen years ago. Fourteen years ago, Mica was 9 years older than Beatris. Then, we can express Mica's age fourteen years

ago as $x + 9$. Now, we will express the respective ages of Mica and Beatris in the present.

	Past	Present (+14 years)
Beatris	x	$x + 14$
Mica	$x + 9$	$x + 9 + 14 = x + 23$

In the present, the sum of the ages of Beatris and Mica is 75. Thus,

$$(x + 14) + (x + 23) = 75$$

$$2x + 37 = 75$$

$$2x = 38$$

$$x = 19$$

x represents Beatris' age fourteen years ago. Then, Bea was 19 years old fourteen years ago.

75. Bus fare is based on the passenger's destination. Php 35.00 is the bus fare for a passenger whose destination is City P. Meanwhile, Php 62.00 is the bus fare for a passenger whose destination is City Q. Suppose that for a trip, the total revenue from bus fare was Php 2290.00. If there are 20 passengers whose destination is City Q. How many passengers are there whose destination is City P?

(A) 30

(B) 35

(C) 40

(D) 55

Answer: A Explanation:

The revenue from bus fare can be expressed as:

$Revenue = (\text{number of passengers going to City P})(35) + (\text{number of passengers going to City Q})(62)$

There are 20 passengers going to City Q and a revenue of 2290:

$Revenue = (\text{number of passengers going to City P})(35) + (20)(62)$ Let x be the number of passengers to City P:

$$2290 = (x)(35) + (20)(62)$$

$$2290 = 35x + 1240$$

$$2290 - 1240 = 35x$$

$$1050 = 35x$$

$$x = 30$$

76. Car A and Car B are moving in the same direction. Car A moves at a rate of 60 kph while Car B moves at a rate of 72 kph. How far is Car B from Car A after 4 hours ?

(A) 46 km

(B) 48 km

(C) 50 km

(D) 52 km

Answer: B Explanation: Recall that $distance = rate \times time$ Car A moves at a rate of 60 kph. In 4 hours, it will cover a distance of $60 \times 4 = 240 \text{ km}$ Meanwhile, Car B moves at a rate of 72 kph. In 4 hours, it will cover a distance of $72 \times 4 = 288 \text{ km}$ Thus, Car B will be $288 - 240 = 48 \text{ km}$ far from Car A in 4 hours.

77. A cyclist is moving at a rate of 13 kph. He traveled from 9:25 AM to 10:40 AM. Determine the distance covered by the cyclist.

(A) 12.25 km

(B) 16 km

(C) 16.25 km

(D) 14.25 km

Answer: C Explanation: Recall that $distance = rate \times time$. We can use this formula to determine the distance covered by the cyclist. The rate of the cyclist is 13 kph. It travels from 9:25 AM to 10:40 Am. Thus, the duration of the cyclist's travel is 1 hour and 15 minutes or 1.25 hours.

To compute the distance covered by the cyclist.

$$distance = 13 \times 1.25$$

$$distance = 16.25 \text{ km}$$

Hence, the cyclist covered 16.25 km throughout his trip.

78. There are two kinds of tickets for a theatre play: student ticket and non-student ticket. The student ticket is Php 100.00 cheaper than the non-student ticket. If 300 non-students and 400 students bought tickets for the play, the total revenue from ticket sales is Php 170 000. How much is a non-student ticket?

(A) Php 200.00

(B) Php 300.00

(C) Php 400.00

(D) Php 500.00

Answer: B Explanation:

Let x be the price of the non-student ticket. The student ticket is Php 100.00 cheaper than the non-student ticket. Then, we can express the price of the student ticket as $x - 100$.

If 300 non-students and 400 students bought tickets for the play, the total revenue from ticket sales is Php 170 000.

We can express the revenue from ticket sales as:

$Revenue = (number\ of\ students)(price\ of\ student\ tickets) + (number\ of\ non - students)(price\ of\ non -$

Using the expressions and values above:

$$170000 = (400)(x - 100) + (300)(x)$$

$$170000 = 400x - 40000 + 300x$$

$$210000 = 700x$$

$$x = 300$$

Since x represents the price of the non-student ticket, then the price of a non-student ticket is Php 300.00

79. A book costs Php 240.00 more than twice the price of a pen. If you buy a book and a pen, you have to pay Php 300.00. How much is a pen?

(A) Php 50.00

(B) Php 40.00

(C) Php 30.00

(D) Php 20.00

Answer: D Explanation:

Let x be the price of the pen.

A book costs Php 240.00 more than twice the price of a pen. Thus, the price of the book can be expressed as: $2x + 240$

If you buy a book and a pen, you have to pay Php 300.00.

$$x + (2x + 240) = 300$$

Simplifying and solving for x:

$$3x + 240 = 300$$

$$3x = 60$$

$$x = 20$$

Since x represents the price of the pen, then the pen costs Php 20.00

80. Candy can type 38 words per minute. How many words can she type in 2 hours?

(A) 4560 words

(B) 4820 words

(C) 5240 words

(D) 5640 words

Answer: A Explanation:

Let's begin by determining how many words Candy can type per hour if she can type 38 words per minute.

There are 60 minutes in one hour. Thus, Candy can type $38 \times 60 = 2280$ words per hour.

In 2 hours, Candy can type $2280 \times 2 = 4560$ words.

Alternative method:

If there are 60 minutes in 1 hour, then there are 120 minutes in 2 hours.

If Candy can type 38 words per minute. In 2 hours, Candy can type $38 \times 120 = 4560$ words.
